

Ken Bai

Creative Technologist | AI & Innovation

917-428-7990 | Queens, NY | Kenbai1027@gmail.com | linkedin.com/in/kenbai

PROFESSIONAL OVERVIEW

Creative Technologist with 10+ years at the intersection of technology, design, development and management. Experienced in working with teams, analyzing problems with critical thinking, concepting creative strategies, and building scalable infrastructure for design-driven organizations.

EDUCATION

Masters of Professional Studies, Design Management

(Expected) May 2027

Jamf Certified Tech & Jamf Certified Associate

May 2024

Bachelor of Fine Arts, Interior Design

May 2012

SKILLS

Direction: Creative Guidance · Concept & Strategy · Project Management · Communications · Team Building

Creative: Brand Strategy · Logo Design · Visual Design · Systems Design · Out-of-Box Thinking · Sketching

AI & Automation: AI API Integration · Vibe Coding · Prompt Engineering · Human-in-the-Loop Workflows

TOOLS

Software: Adobe Suite · Google · Figma · Canva · Affinity · Capcut · Mac OS · Windows · Linux · Slack

AI: ComfyUI · Open Code · LLMs (Claude, GPT, Gemini) · Generative AI (Nanobanana, Flux, GPT Image)

Management: Jamf Pro · Apple School Manager · Asana · Model Context Protocol · Command Line Interface

WORK EXPERIENCE

Founder & Creative Director | White Crane Design LLC, New York, NY *Jan 2023 – Present*

- Direct creative strategy, visual identity, and brand systems for clients translating business goals into cohesive design experiences across digital and physical channels.
- Develop AI-assisted design systems including prompt engineering frameworks, generative apparel experiments, and creative automation systems.
- Operate White Crane as an experimental creative technology lab, as well as a design studio. Prototyping human-in-the-loop AI systems, conducting research, working with clients and creating meaningful products.

Technology Analyst & Mac Systems | Pratt Institute, Brooklyn, NY *Apr 2022 – Present*

- Build generative AI workflows, LLM-integrated design pipelines, and Python-based automation tools for creative teams.
- Architect and oversee a 120+ Apple endpoint ecosystem across academic labs, aligning infrastructure strategy with curriculum needs each semester.
- Lead and mentor a 20+ person cross-functional team, building workflows, accountability systems, and a culture of proactive communication.
- Manage enterprise Apple MDM via Jamf Pro and Apple School Manager: device enrollment, configuration profiles, app deployment, and Smart Groups.
